PROJECT SHOWCASE

Dynamic Rock Paper Scissors Game Website

Duration: 2 Weeks

This Game built with HTML, CSS, and JavaScript, provides an interactive and engaging experience for users. The combination of frontend technologies ensures a visually appealing and responsive design, enhancing the overall gaming experience.

Interactive Number Guessing Game Experience

Duration: 3 Days

This interactive game allows users to input guesses within a defined range, receiving real-time feedback. This project demonstrates my foundational skills in frontend technologies, JavaScript logic, and user interface design.

YouTube Webpage Clone Simulation Project

Duration: 1 Month

This YouTube webpage clone using HTML and CSS, showcasing expertise in advanced layout techniques like CSS Grid and Flexbox. The project highlights proficiency in replicating complex designs while ensuring responsiveness.
